# SmarTouch 2 App.

HAWF-300 WiFi & Bluetooth Spa controller

2.4GHZ/ 5GHZ

*(Note; SmarTouch has one "T" )*

Download the "SmarTouch 2" app

Turn off main power to the spa at the Circuit Breaker.

Disconnect the spa keypad or spa-side control panel from the main PCBoard

Connect the HAWF-300 module instead

Reconnect the control panel to the grey color connector attached to the WiFi cable.

Restore power to the spa.

Open the "SmarTouch 2" app.

Must be within 20ft. away from the spa to complete the installation.

## Bluetooth

" Controller Basic Settings" screen is displayed. Enter a spa name of your choice then touch SET

You are now connected via **Bluetooth,** next step is to connect to your WiFi network.

## WiFi

1. Select MENU top left corner on the phone screen.
2. Select Configuration.
3. Select WiFi Configuration . Wait few seconds and select your router / network form the list displayed on your phone screen .
4. Enter the WiFi Network / Router Password
   Touch **CONNECT**,

   Your phone screen will display both connection options **Bluetooth** and **WiFi.**

## *IMPORTANT*

*Since water is a barrier and blocks the WiFi signal, do not install the WiFi module behind or to the side of the spa facing away from the house / router . Must have a clear line of sight between the WiFi module and the Router / House. It is very important to insure you have a strong WiFi signal available from your wireless router.*
